

Bhargav Rishi Mediseti

Tampa, FL | rishibhargav.m@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Results-driven data engineer and AI practitioner with **3+ years** of experience in delivering scalable ETL and analytics solutions across Ab Initio, SQL databases, and GCP; expertise in LLMs, DL/ML, and Agentic AI. Delivered end-to-end systems from design to deployment with a proven record in improving performance and data quality, and driving measurable outcomes. Adept in Tableau, Power BI, and cloud platforms. Recognized for translating business goals into data products, cross-team collaboration, and enabling faster, clearer decisions.

Education

University of South Florida

Master of Science in Artificial Intelligence & Business Analytics

Aug 2024 – May 2026 (Expected)

GPA: 4.00

Skills & Certifications

Programming & ML: Python; Django; DL/ML frameworks; SQL/PL/SQL;R; C/C#/Java; Linux/UNIX; HTML/CSS/JS

Databases: Oracle, MSSQL, PostgreSQL, MySQL/MariaDB, IBM Netezza, MongoDB, Supabase/pgvector

Cloud Technologies: Amazon Web Services, Google Cloud Platform, Microsoft Azure, Oracle, Snowflake

Tools/Services: Ab Initio, PowerBI, Tableau, R Studio, Jenkins, JIRA, MS Office, Control M, MS: SSMS, SSIS, SSRS

Competencies: ETL and data pipelines, Data Engineering, AI, Data Warehousing and Modeling, Data Analysis, Real Time Data Processing, Data Mining, ML/DL, Statistical Analysis, Data Visualization, Application Development

Certifications: Snowflake SnowPro Associate (2025), Google Certified Associate Cloud Engineer (2024)

Soft Skills: Client Communication, Stakeholder Management, Problem Solving in Control Failures, Adaptability, Time Management, Cross-functional Collaboration

Professional Experience

Graduate Research Assistant – University of South Florida, Tampa, FL

Jan 2025 – Present

- Reduced instructor outreach effort by **~70%** with CRAFT, a Django app on Azure integrating Canvas LMS, with REST APIs and secure auth, enabling instructors to track student activity and send bulk/personalized outreach
- Trained and supported **700+ students** in Microsoft Office and Tableau by leading review sessions and in-class help, improving technical proficiency and on-time submissions
- Delivered consistent nutrition-aligned recipe recommendations with a Food-as-Medicine app that unifies rule-based and RAG/LLM flows

Senior Systems Engineer (Data Engineer) – Infosys/Virgin Media, Hyderabad, India

Jan 2021 – May 2024

- Designed Ab Initio pipelines ingesting **40 M+** records to modernize warehouse & cutting reporting time by **60%**
- Led GDPR projects valued at **\$13 M** that helped save **~ \$45 M** and strengthened privacy compliance
- Migrated **50 M records** to Oracle and Netezza with **100% accuracy** and minimal downtime; engineered models improving retrieval speed by **20%**
- Orchestrated weekly data refreshes of millions of customer records, covering **98% of the UK population**, to drive targeted and effective marketing campaigns
- Received Infosys’ “INSTA” Award **4 times** for consistent delivery excellence and exceeding expectations

Project Experience

Aug 2024 – Aug 2025

- Agentic AI & Deep Learning for Transport Mode Optimization** - PyTorch cost-prediction model paired with Q-learning agent to recommend cheapest/fastest/balanced freight modes; supports forecasting via interpolation
- Skeleton-based Human Action Recognition (Deep Learning)** - Recognizes actions from 3D skeletons to enable gesture-based worker-robot interaction; compared ST-GCN, TCN, and Transformer; **78% accuracy**
- Smart Crop Prediction (Machine Learning)** - Recommends the most suitable crop for a given field by modeling soil and weather properties with DT/RF/SVM/Naïve Bayes, achieving **up to 91% accuracy**
- USF Concierge Multi Agent RAG System for University Onboarding** - Multi agent Streamlit and Python RAG assistant using Supabase PostgreSQL with pgvector, recursive chunking and google/embeddinggemma-300m embeddings, with safety guardrails, and MCP tools that call Gmail and Google Calendar through audited actions that require human confirmation.
